Starter Course: Underlying course can be the Number 1 Grade product used on outer course or a lower grade product.

Please note: 1) Handsplit shakes are also known as Handsplit-and-Resawn shakes.

2) Do not interlay shakes or shingles with felt on sidewall applications.

Coverage Guidelines

- Sidewall squares are calculated in a different manner than roof squares.
- Remember to deduct window and door areas from coverage calculations.

Product Coverage Calculations

Ensure you have the following information:

1. Size of wall area you are trying to cover, measured in square feet.
2. Application and exposure to be used
3. Product type used
4. Amount of product in each box or bundle

Your supplier will be glad to assist you. Ask for warranty requirements including product labels before purchasing product. As usual, always check with your local building official for requirements in your area.

Sidewall Shake Packaging

- Shakes are packaged in bundles, secured with a metal strap. Each bundle will have a Certi-label® underneath.
- While most 18" shakes are packed in bundles of 12 courses each side (12/12) they may be packed 9/9. This will alter the number of bundles required to cover 1 square. Check with your supplier for more details.

For example: 18" shake bundles, 12/12 pack, 5 bundles, should cover 100 square feet at 7 1/2" exposure.

9/9 pack, 5 bundles, should give 75% coverage of a square at 7 1/2" exposure. When ordering check with your supplier to confirm bundle size.
